ARCHITECT

Roger Ferris + Partners
and Gensler

New Hudson Facades is delivering 575,000 square feet of curtain wall for 70 Hudson Yards, the next tower in Related Companies and Oxford Properties Group's Hudson Yards mixed-use development.

Designed by Roger Ferris + Partners and Gensler, the 717-foot-tall office tower features high-performance systems and complex architectural elements.

Key design features include cantilevered podium elements, large terraces across multiple office floors, and vertical sunshades that create a striking exterior grid. The all-aluminum facade of the 70 Hudson Yards curtain wall incorporates triple-glazed, bird-friendly glass to meet NYC Energy Code and "City of Yes" goals.

Currently in Design Assist, production begins in May 2026, with completion in 2028.
